CONTENTS — TABLE DES MATIÈRES — INHALT

PAGE

ASKINAZI, D. L., et K. E. GUINSBOURG, Problème de la diminution du phosphore dans l'extrait acétique des sols 3

BOCOCK, K. L., and O. J. W. GILBERT, The disappearance of leaf litter under different woodland conditions 179

BOKEN, ELSE, Investigations on the determination of the available manganese content of soils 269

BOLLE-JONES, E. W., Copper: Its effects on the growth and composition of the rubber plant (*Hevea brasiliensis*) 160

BROMFIELD, S. M., The properties of a biologically formed manganese oxide, its availability to oats and its solution by root washings 325

FENTON, R. T., A laboratory study of nitrogen mobilisation during litter decomposition 202

FREI, ERWIN, Eine Studie über den Zusammenhang zwischen Bodentyp, Klima und Vegetation in Ecuador. 215

HAGENZIEKER, F., Soil-nitrogen studies at Urambo, Tanganyika Territory, East Africa 97

HAGIN, J., Comparison of availability of phosphorus from granulated and powdered superphosphate by calculations of yield curves related to the phosphorus added and found in soil and plant tests 114

HESSE, P. R., Sulphur and nitrogen changes in forest soils of East Africa 86

HILL-COTTINGHAM, D. G., and C. P. LLOYD-JONES, Behaviour of iron chelates in calcareous soils. II. Laboratory experiments with some further chelating agents 189

JONES, L. H. and D. A. THURMAN, The determination of aluminium in soil, ash and plant materials using Eriochrome Cyanine R. A. 131

LEHR, J. J., and J. M. WYBENGA, Exploratory pot experiments on sensitiveness of different crops to sodium: D. Barley 237

LEYTON, L., The relationship between the growth and mineral composition of the foliage of Japanese larch 31

LU, K. C., and W. B. BOLLEN, Effect of Gibrel, a potassium salt of gibberelic acid, on microbial activities in soil 318

MATTINGLY, G. E. G., and F. V. WIDDOWSON, Uptake of phosphorus from P^{32}-labelled superphosphate by field crops. Part I. Effects of simultaneous application of non-radioactive phosphorus fertilizers 286

MAYAUDON, JACQUES, et PAUL SIMONART, Étude de la décomposition de la matière organique dans le sol au moyen de carbone radioactif II. Décomposition du glucose radioactif dans le sol. A. Répartition de la radioactivité dans les fractions humiques du sol 376

MULDER, E. G., Jan Smit 1885–1957 1

NYE, P. H., and W. N. M. FOSTER, A study of the mechanism of soil-phosphate uptake in relation to plant species 338

PAAUW, F. VAN DER, Relations between the potash requirements of crops and meteorological conditions 254

SCHÄFER, P., Die Problematik der Bodenverdünnung durch Sand bei der pflanzenphysiologischen Gefäszmethode zur Bestimmung des im Boden vorhandenen pflanzenaufnehmbaren Nährstoffvorrates 143

SCHARRER, K., und J. JUNG, Über den Einfluss verschiedener Anionen auf die Aufnahme von Calcium, Natrium and Kalium 49

SCHÜTTE, K. H., *Letter to the editors.* Micro-nutrient deficiency and wilting in the radish 186

SIMONART, PAUL, et JACQUES MAYAUDON, Étude de la décomposition de la matière organique dans le sol, au moyen

de carbone radioactif. I. Cinétique de l'oxydation en CO_2 de divers substrats radioactifs 367

SIMONART, PAUL, et JACQUES MAYAUDON, Étude de la décomposition de la matière organique dans le sol au moyen de carbone radioactif. II. Décomposition du glucose radioactif dans le sol. B. Répartition de la radioactivité dans l'α-humus 381

STEINBERG, ROBERT A., and R. N. JEFFREY, Comparison of pruning (topping, suckering) effects in normal and boron-deficient tobacco on relative growth and alkaloid content of leaf, stalk, and root 64

SUTTON, C. D., and E. G. HALLSWORTH, Studies on the nutrition of forage legumes. I. The toxicity of low pH and high manganese supply to lucerne, as affected by climatic factors and calcium supply. 305

WALKER, T. W., and A. F. R. ADAMS, Competition for sulphur in a grass-clover association 353

WIERSUM, L. K., The relationship of the size and structural rigidity of pores to their penetration by roots. 75

WYBENGA, J. M., and J. J. LEHR, Exploratory pot experiments on sensitiveness of different crops to sodium: E.Red table beet 385
